Inezgane-Aït Melloul 🏠

SUMMARY

Full-stack developer experienced with the MERN stack (MongoDB, Express, React, Node). Skilled in building practical web applications that combine technology with smart business ideas. Continuously improving coding skills while creating projects that are useful and easy to use. Focused on delivering web apps that solve real problems and support business growth.

EDUCATION

Diploma of Technology in Business Intelligence & Statistics

Ecole Supérieure de Technologie — 2022 to 2024

- Gained a strong foundation in computer science, data analysis, and programming. Developed skills in algorithms, C/C++, Python, SQL, networking, and Linux. Studied statistics and machine learning fundamentals, with practical experience in data handling and system-level operations.

DIGITAL SKILLS

- Tailwind CSS
- React.js & Next.js
- MongoDB (Mongoose)
- Linux (Bash Script)
- SQL & MySQL
- Jira Software
- JavaScript
- Node.js (Express)
- Python
- Power BI
- Git & GitHub
- Postman

CERTIFICATIONS

- **Python Programmer Bootcamp | 365 Data Science**
- **Git and GitHub | 365 Data Science**
- **SQL | 365 Data Science**
- **Software Developer Bootcamp | GOMYCODE**

PROFESSIONAL EXPERIENCE

GUI Developer at DISIS Maroc, Ait Melloul

April 2024 - May 2024

- Built a GUI-based inventory management app using CustomTkinter (Python Library) for mrinformatique.com, featuring user authentication, database integration, and an intuitive UI for efficient stock tracking and management.

Web developer at Vala-orange, Agadir

June 2025 - July 2025

- Learn and built a Next.js app while practicing and improving my skills with the MERN stack. Gained experience in UI design, RESTful APIs, and integrating front-end and back-end. Focused on creating scalable applications and following best coding and design practices.

PROJECTS

- **Inventory Management App** – Built a GUI-based inventory system using CustomTkinter for mrinformatique.com, streamlining product stocking and management workflows.

- **Communify** – MERN Social Platform – Built a full-stack social app with real-time chat, video calls (Stream SDK), and JWT auth. Designed a responsive UI with React, Tailwind, DaisyUI; implemented friend system, protected routes, and deployed via Render.

- **Capital Tracker** - A a full-stack finance app using Next.js, React, Prisma, Tailwind, and Clerk.js for secure login. Integrated Google AI for smart insights, receipt scanning, budgeting, and used Inngest and Arcjet for workflows and protection.
